

**RFP 102016**  
**Question & Answer Document**

1Q: Can you confirm that answer provided in Question 1 for the RFP 072016 Questions and Answers is still correct that approximately 84.3% of GST load should be mapped to Standard Service and 32.4% of LPT should be mapped to Standard Service?

1A: Based on the most updated information, the following mapping represents UI's best estimate of how to map GST and LPT load: For GST, about 84.5% is mapped to Standard Service eligibility for energy (kWh) and about 82.5% for demand (kW). For LPT, about 32.4% is mapped to Standard Service eligibility for energy and about 31.6% for demand.
